

Excluding Specific Characters

[^]

The negated character class `[^]` matches any character that is *not* in the square brackets.

In the above image, the Regex Pattern is matched with the Test String.

Task

You have a test string S .

Your task is to write a regex that will match S with the following conditions:

- S must be of length **6**.
- First character should *not* be a **digit** (**1**, **2**, **3**, **4**, **5**, **6**, **7**, **8**, **9** or **0**).
- Second character should *not* be a **lowercase vowel** (**a**, **e**, **i**, **o** or **u**).
- Third character should *not* be **b**, **c**, **D** or **F**.
- Fourth character should *not* be a **whitespace character** (**\r**, **\n**, **\t**, **\f** or **<space>**).
- Fifth character should *not* be a **uppercase vowel** (**A**, **E**, **I**, **O** or **U**).
- Sixth character should *not* be a **.** or **,** symbol.

Note

This is a regex only challenge. You are not required to write any code.

You have to fill the regex pattern in the blank (_____).
